

Deep Learning

Exercise "Applications of Deep Learning"

Prof. Dr. Jürgen Brauer

Exercise

Since 2012 there has been a boom in machine learning due to the progress made in the field of Deep Learning. However, which concrete applications has this brought us and in which areas?

In this exercise your task is to do a small search using the WWW to find concrete products, tools and applications where Deep Learning algorithms are used.

Compile what you can find on ca. 5-10 slides and present your search results to your fellow students in the next exercise. 2-3 students shall present what they have found.
